

ITAV Meeting 03.27.2019

Main Discussion

The group had a general discussion on multiple topics.

Fellowship Hall Projectors- Now that it has been repaired what are the next steps. Should it be new laser projectors or simply a flat screen tv.

Audio Sound Boards – The board in FH has been acting up and the board in the nave doesn't have enough inputs for needs. Ideally, both boards would be replaced with identical brand/series of soundboards. The only difference would be that FH would have more channels. But any one trained on one board could easily know how to use the other.

Live Streaming of services – How possible is it to stream to either youtube or Facebook live? What licensing would be needed to cover music usages? Additional gear would be required to implement streaming capabilities.

Fellowship Hall Camera – would it be more ideal to add a fixed camera for the IMAG (Image Magnification) for the children's sermon?

Next Meeting will be April 24, 2019
